Submitted To : Ms. Unisse Chua - CCAPDEV S14

About the Web Application:

The group decided to create a web application that will transform the facebook group, “DLSU Profs to Pick”, to an actual online platform. DLSU Profs to Pick 2.0 will be a secured web application that will be exclusively accessible by students of De La Salle University. To ensure the safety and well-being of all sectors, the web application is equipped with safety precautions such as: Rules and Regulations, Forum Administrators, Forum Moderators, Forum Contributors, and alike.

Features of the Web Application:

The web application is anchored towards four key indicators: Security, Simplicity, Reliability, and Completeness. To ensure the consistency of the web applications, the group decided to provide the following features based on the aforementioned key indicators:

Security

- Mandatory user registration
- Community administrators, moderators, and contributors
- Anti-discriminatory community guidelines (no cursing, etc.)

Simplicity

- User-friendly interface
- Convenient menu navigation
- Convenient log in - log out navigation
- Convenient changing of password
- Convenient post sectioning (college, course, professor)
- Convenient post and comment management
- Convenient prof searching and filtering
- College sorted professors

Reliability

- Community Administrators are in charge of sanctioning users who goes against the community guidelines
- Community Administrators are in charge of managing posts/reviews that go against the community guidelines
- Community Administrators are in charge of fixing review data (incorrect course/prof selected)

Completeness

- Sample list of professors under all seven Colleges.

Specific Features of the Web Application:

User Register

A user should be able to register an account with a name and ID number.

User Log In

A user should be able to log in every time they want to access the web app with their account.

User Logout

A user can log out of the account whenever the user wishes to log out.

See College

A user can view or click which college they wish to visit and see information on the certain college.. (Example: Programming Professors, Math Professors, etc)

See All Professors

A user can view all professors with the following information such as name, courses, and college.

Search Professors/Subjects

A user can search for a certain professor by their name and/or subject that will show the matched post subject forum post and/or professor information.

See Most Recent Reviews

The user can see all the recent posts on the homepage. (limited to ten).

Create Post

A user can post a review about a certain professor in the selected college and course chosen.

Edit Post

A user can edit a post he/she posted.

Delete Post

A user can delete posts he/she had already posted.

Comment

A user can comment on a post posted by other users and/or his/her own post.

Edit Comment

A user can edit a comment he/she posted.

Delete Comment

A user can delete his/her own comment.

General

Great user experience. Visitors can easily navigate without help, all information is easy to access. Great visual design. Design suits the theme of the application, and is cohesive and consistent across the whole application.
